Installing the SAT Words App

Put SAT Word Study on your iPhone's home screen like any other app. It opens full-screen with its own icon, with no App Store and no download. It takes about a minute.

You'll need:

- An iPhone or iPad with Safari
- The Google account your teacher invited

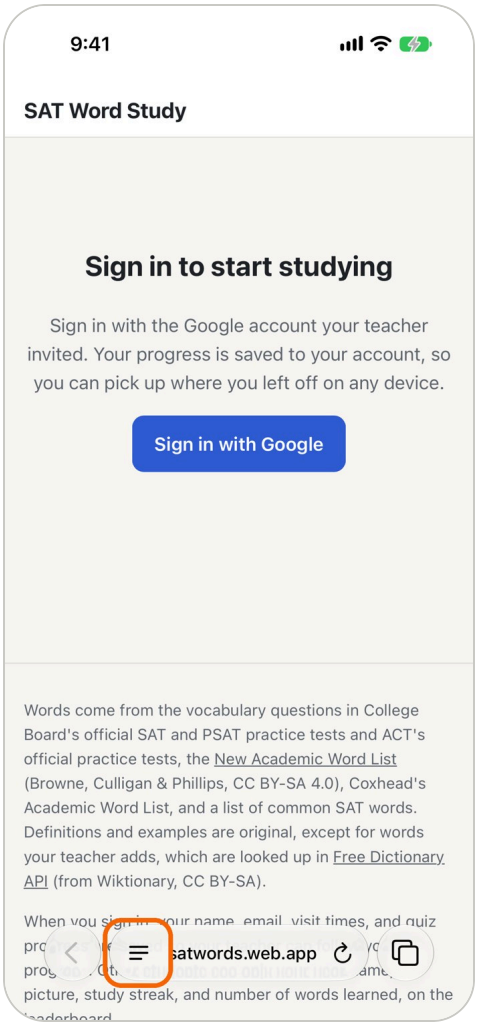

1 Open the site in Safari

Open **Safari** and go to:

`satwords.web.app`

Then tap the **Page Menu** button (≡) at the left of the address bar.

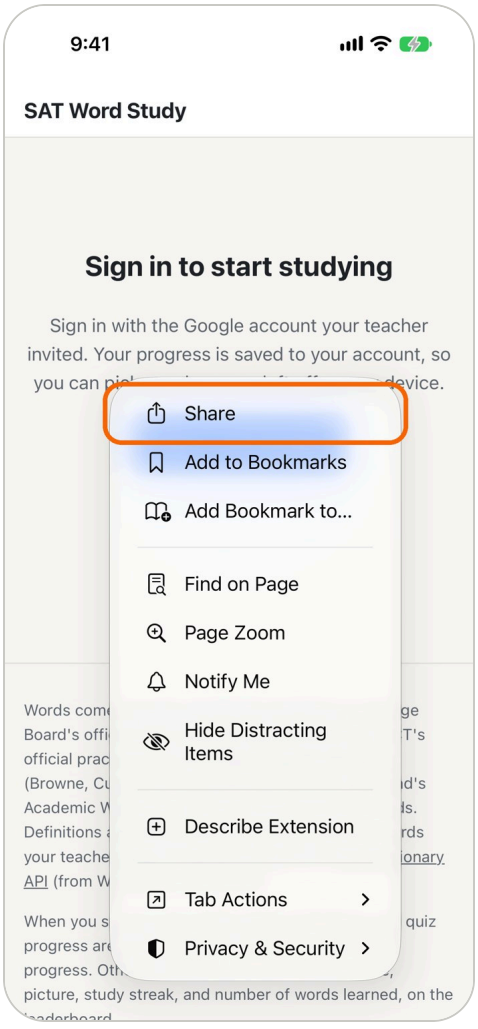

You don't need to sign in yet. You'll sign in inside the app in step 7.

2 Tap Share

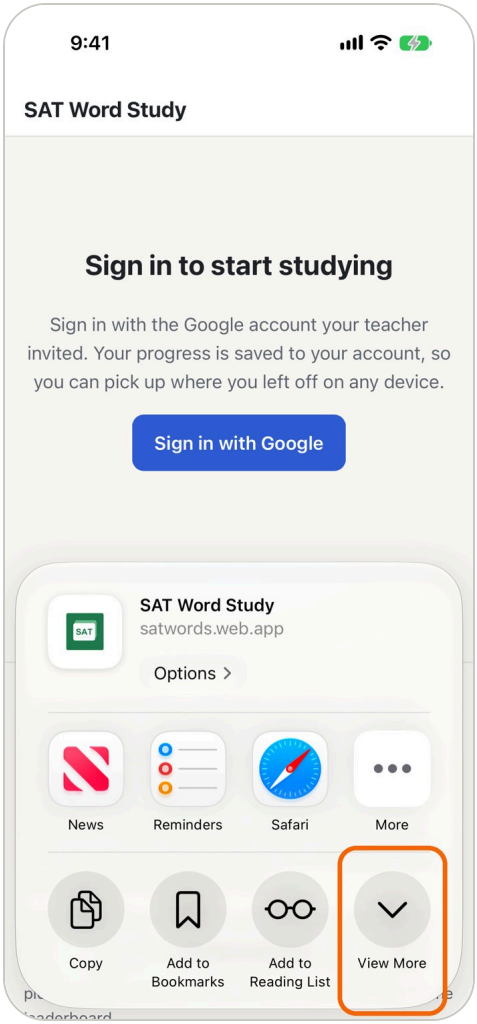

In the menu that opens, tap **Share**.

On some iPhones, a Share button (a square with an arrow ⬆) is right in the bottom bar. If you see one, tap it and go on to step 3.

3 Tap View More

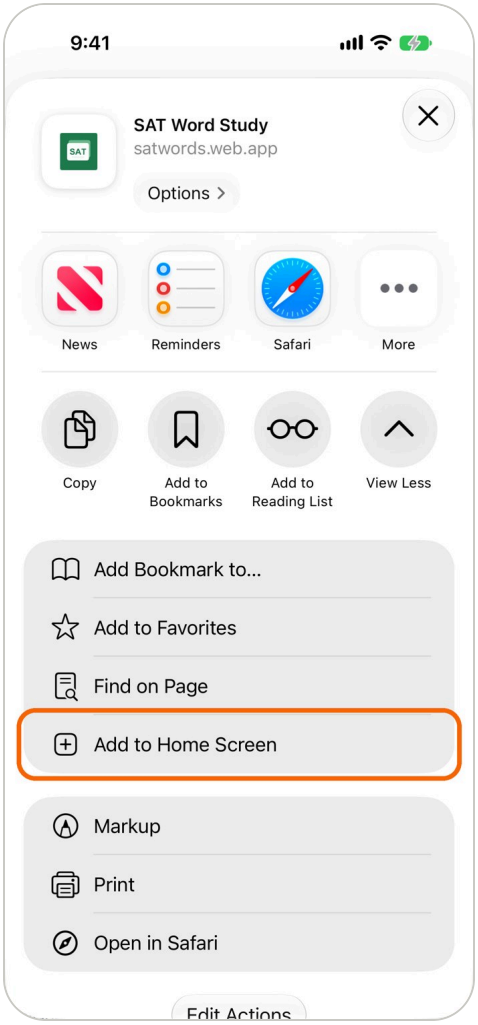

The share sheet slides up. Tap **View More** to see the full list of actions.

4 Tap Add to Home Screen

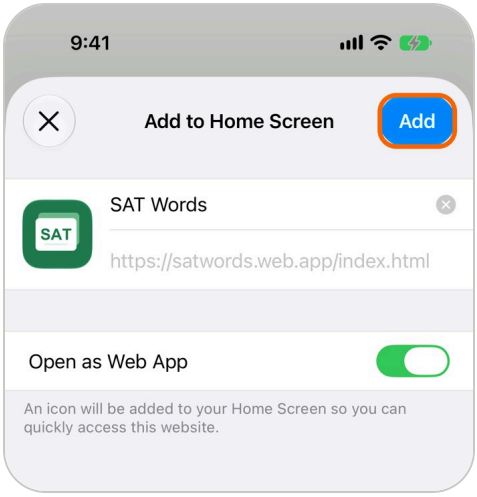

Tap **Add to Home Screen**.

Not in the list? Scroll to the bottom, tap **Edit Actions…**, and add it.

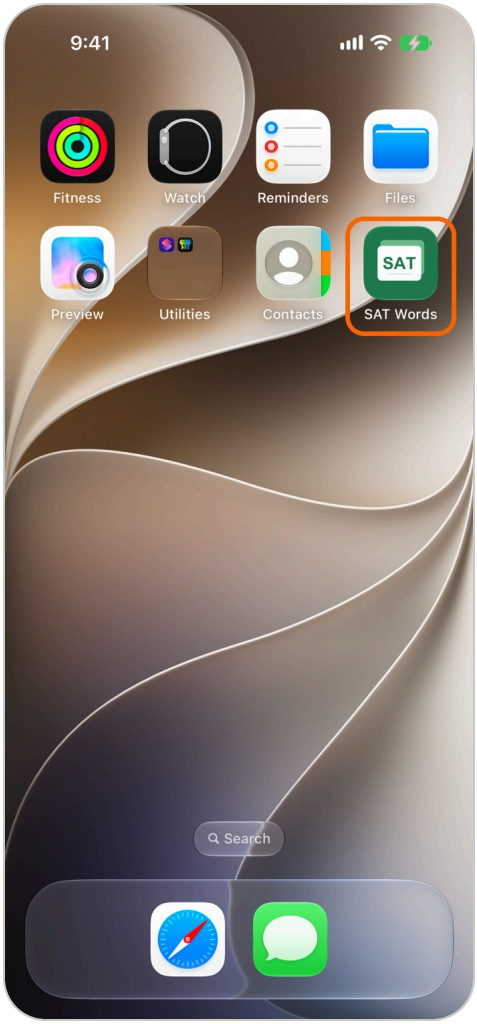

5 Tap Add

You'll see the app's icon and its name, **SAT Words**. Leave **Open as Web App** turned on, then tap **Add** at the top right.

6 Open SAT Words

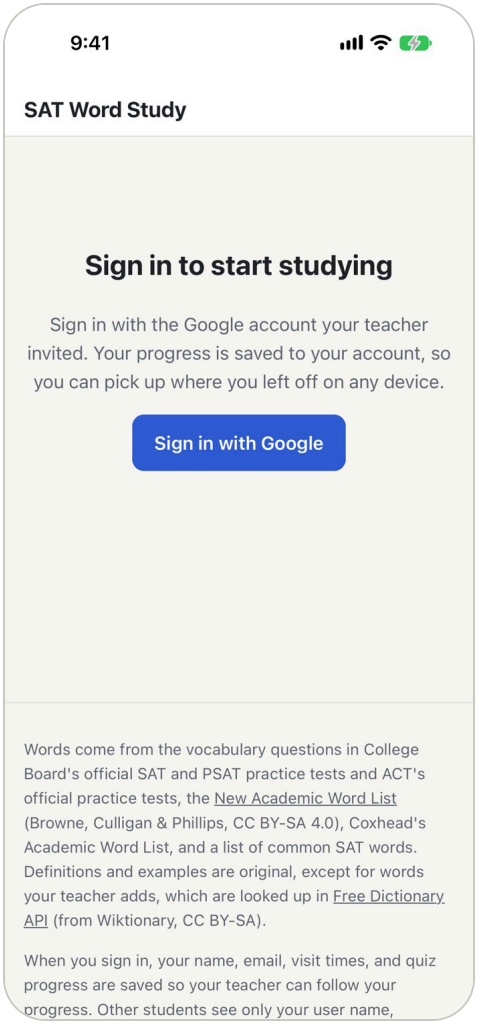

The **SAT Words** icon is now on your home screen. Tap it to open the app.

7 Sign in

The app opens full-screen, without Safari's address bar. Tap **Sign in with Google** and choose the account your teacher invited.

The home-screen app keeps its own sign-in, separate from Safari. Even if you already signed in on the website, you'll sign in once more here. After that, it remembers you.

If something goes wrong

Add to Home Screen isn't in the list	Make sure you're in Safari. Scroll to the bottom of the list, tap **Edit Actions…**, and add it.
It won't let you in after you sign in	Check that you picked the Google account your teacher invited. If it still doesn't work, ask your teacher to check your invite.
Sign-in goes back to the sign-in screen	Close the app completely (swipe it away), reopen it, and try again. If it keeps happening, tell your teacher.
The address bar still shows	You opened the site in Safari, not the app. Close Safari and tap **SAT Words** on your home screen.

Removing the app

Press and hold the **SAT Words** icon, tap **Remove App**, then tap **Delete from Home Screen**. Your progress is saved to your account, so it will still be there if you add the app again.

Android phones

Open the same address in **Chrome**, tap the ⋮ menu at the top right, and tap **Add to Home screen** (or **Install app**). Then open **SAT Words** from your home screen and sign in.
